

MT100, MT340, MT650

Micro-Hydro Turbines

- Maintenance-free brushless generator
- Suitable for drinking water
- 12V or 24V output voltage available
- High efficiency through perfect match of turbine and generator
- Heavy-duty design, long life span
- Easy to install, no adjustments necessary
- Suitable for PV hybrid systems
- Perfect battery charging in combination with a rectifier and Phocos PL controllers

This portable micro-hydro turbines are equipped with a high efficiency permanently excited low-voltage generator with an external rectifier for charging batteries.

The MT turbines can be used in locations where a water flow of three liters per second with a minimum head of 6 meters is available. Due to a special generator design a very high overall efficiency can be obtained.
